

UltraLite Air Frame Game Assembly (with game panel):

Our UltraLite Series of Air Frame Games feature a lightweight unit that has a constant air blower built right into the unit, with simply set up—hit the switch and you're ready to go in minutes! The frame features finger-safe netting on the sides, as well as at the base of the unit. Whether customers hit or miss the targets our new inclined plane works as a ball return.

- First, place the game — perfect for small backyards or gymnasiums.
- Attach the Theme Panel before inflation (two people will make this easier).
DO NOT WALK on the GAME, after inflation!
There are (3) hook-and-loop strips.
- Plug in the Device— simply inflate by turning on the Built-in Air Pump.
Set up only takes minutes.
- For outdoors use, package comes with 4 Hook Stakes to secure it to the ground.
- The interchangeable Game Panels attach using Hook and Loop (velcro).
This allows you to swap game panels quickly and with ease.
- Most games are played with a bean bag or soft, squishy ball.
- To break down game; deflate, remove panel, and place into the Carrying Bag
—for easy storage and transportation from event to event.
- Clean with water, if necessary.

Additional game panels sold separately— to suit the event or theme.

Power Usage Note: The blower draws 2.2amps. To determine the number of 2.2-amp blowers you can run on a 15-amp breaker, you must apply the 80% rule for continuous load to ensure safety and prevent the breaker from overheating and tripping
